

WD 1.31 On Page 11 of Mr. Kief's testimony (line 363), he indicates that the office, clerical, and customer service employees will be City staff. Indicate the number of City employees currently used for these duties in relation to the City's sewer system. Does the City have plans to hire additional people for these duties upon acquisition of the water system? If so, provide a cost estimate.

RESPONSE: The City currently has a part-time clerical person receiving calls in relation to the street and sanitary sewer collection system (exclusive of wastewater treatment and billing). The City currently plans not to hire an additional person for these tasks, but will hire on as a needed basis.

Response prepared by:

Dennis Kief
City of Pekin
